EDUCATION

Grinnell College

Iowa, USA

Double Major: Computer Science and Mathematics, GPA: 3.92/4.0

Aug 2025 – 2028

Relevant Coursework: Algorithm Design & Data Structures · Probability & Statistical Inference · Econometrics · Optimization Methods · Machine Learning & Modeling · Databases & Distributed Systems.

EXPERIENCE

FinBud AI

Aug. 2025 – Apr. 2026

Software Engineer Intern

Chicago, Illinois (remote)

- **Market Systems Integration:** Integrated a **financial intelligence chatbot** by connecting a **FastAPI** backend with a **Vue.js** frontend, enabling 1,000+ users to make **data-driven investment decisions** using **real-time market data**.
- **Model Accuracy & Data Quality:** Built a **retrieval-augmented generation (RAG)** pipeline using **LangChain** and **ChromaDB** to ground LLM outputs in **live financial data**, improving accuracy by 15%, eliminating hallucinations.
- **Performance Optimization:** Improved system performance through **database indexing** and **multi-layer caching**, reducing query latency by 20% and increasing responsiveness under high user load.

Center for Environmental Economics and Climate Change Studies (CECCS)

May. 2025 – Aug. 2025

Software Engineer Intern

Hanoi, Viet Nam

- **Quantitative Optimization:** Developed a **geospatial optimization model** using **Python** and **GIS libraries** to identify high-return solar and wind sites across 9,000+ cells, improving model precision by 35%.
- **Data Pipelines & Modeling:** Built **end-to-end data pipelines** to process multispectral satellite imagery (Sentinel-1/2) using **GDAL** and **scikit-learn**, improving site selection accuracy by 20%.
- **Quantitative Research:** Co-authored a research analyzing the **Levelized Cost of Electricity (LCOE)** for offshore wind in Vietnam, earning a **Scholar Award (AICEE-2025)** and pending publication in a **Scopus-indexed journal**.

Career Foundation Hub (CF Hub)

Nov. 2024 – Feb. 2025

Software Engineer Intern

Virginia, United States (remote)

- **Workflow Automation:** Built a **full-stack automation system** with web crawling, **NLP-based matching**, and AI-driven recommendations to optimize job strategies, improving application callback rates by 20%.
- **Scalable ML Systems:** Developed an **AI chatbot** using **LangChain**, **OpenAI APIs**, and **ChromaDB** to deliver personalized guidance, scaling mentorship capacity from 50 to 500+ users.
- **Product Optimization:** Improved system usability and response quality through **prompt engineering** and feedback-driven iteration, maintaining 80%+ user satisfaction at scale.

PROJECT

GrinnDorm

Mar. 2026 – Now

Developer

Grinnell, IA

- Built and deployed GrinnDorm, a **full-stack** dorm rating platform serving 100+ users weekly at Grinnell College.
- Built interactive dorm ranking and campus map features using **React**, **Node.js**, **PostgreSQL/Supabase**, and **REST APIs** for real-time recommendations.
- Deployed scalable cloud infrastructure on **AWS EC2, S3, and CloudFront** with **JWT authentication**, secure database policies (RLS), and optimized frontend performance.

LEADERSHIP

Student Government Association @ Grinnell College

Sep. 2025 – Now

Student Educational Policy Committee (SEPC) Coordinator

Grinnell, IA

- Lead coordination of 25+ departmental Student Educational Policy Committees (SEPCs) to strengthen academic community building, faculty-student collaboration, and departmental programming across campus.
- Manage budgeting and resource planning to support advocacy, event execution, and communication.
- Collaborate with senior administrators to align student academic initiatives with institutional goals.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL, R, MATLAB, HTML/CSS, LaTeX

Frameworks & Libraries: FastAPI, React, Next.js, Node.js, Express.js, LangChain, PyTorch, NumPy, Pandas

Cloud & Databases: AWS (EC2, S3, CloudFront), PostgreSQL, Supabase, MongoDB, MySQL, SQLite, ChromaDB

Tools & AI: Docker, Linux, Git, PyTorch, scikit-learn, RAG
